

BISHOP-BROGDEN ASSOCIATES, INC.

HYDROGEOLOGY / WATER RESOURCE ENGINEER

Bishop-Brogden Associates, Inc. (BBA) is a consulting firm specializing in surface and ground water hydrology, water rights and water resource planning. Located in Englewood, Colorado, BBA provides services to clients in the Western United States, mostly within the State of Colorado. BBA's clients include a variety of public and private entities including municipalities, special districts, ranchers, local and federal government, corporations and others.

We are seeking applications for a position as a junior-level hydrogeologist or water rights / water resources engineer from applicants with the following skills and qualifications.

- BS or MS in hydrogeology, water resources, civil or agricultural engineering, hydrology, or related field.
- 1 - 4 years' experience preferred, but not required
- Strong written and verbal communication skills.
- Proficiency with geology and well drilling, database and spreadsheet software; GIS experience is a plus.
- Knowledge about and experience with Colorado water rights and water law.
- Registration as an EIT, or plans to pursue licensure as an engineer, hydrologist or geologist.
- Comfortable in an office work environment with periodic field work required throughout the year. Light lifting and physical coordination in a field environment may be required.

You will be joining a friendly, fun-loving, and hard-working team of various professionals who are all passionate about water. BBA offers competitive salaries, provides a complete benefits package, supports professional development and offers a comfortable and flexible work environment. If you are looking to build a future with a firm that embraces a culture of stability, a career with BBA is a solid choice. Our staff average more than 10-years of commitment to the firm because we are dedicated to service excellence, professional development and a cohesive work environment.

Applicants should provide a letter of interest and resume to bba@bbawater.com. For more information, please see our web site at www.bbawater.com.
